

IPLASMA-DE®

.....
Technologies,
allowing the world
not to stop

About us

**We create solutions
for disinfection
for a better life**

IPLASMA-DE GmbH is an R&D and Service company, the main activities of which are:

> [01]

Scientific research and R&D at the intersection of breakthrough areas in the physics of low-temperature (cold) plasma, bio- and nanotechnology.

We carry out a full set of tests to confirm the effectiveness of the proposed solutions on the international level

> [02]

Development and promotion turnkey solutions for innovative equipment based on cold plasma technology, in the following main areas:

- devices for cold plasma disinfection and sterilization of places where a person is present (both in stationary and portable, wearable, version);
- medical devices for processing living tissues with cold plasma in such areas of medicine as dermatology, dentistry, etc .;
- devices for cold-plasma water purification;
- devices for cold-plasma air purification;
- devices for cold plasma processing in the food industry, agriculture, etc.

Scorpius

A unique mobile device for disinfection of places where people are present. Kills 99.999% of all known pathogens (including COVID, anthrax and others). Powered by pure distilled water (no chemicals).

> Unique

Has no analogues in the world in terms of efficiency / price / environmental friendliness

> First time on market

RnD for 3 years, registered in record time - 9 months!

> Verified and Certified

The device has passed all phases of testing and has all the necessary documents for operation.

> Legally proved

Device has all Russian and international patents

Scorpius key advantages

Performance

In just 10-15 minutes, disinfection of 100 sq.m. is carried out. No additional wiping required, safe for electronics, technology. Envelopes the entire surface of objects indoors from all sides

Ecology, GreenTech

No chemicals used, 100% green technology!

Mobility

The device is working from a standard battery, no need to connect to the mains, the weight of the device is only 4.5 kg.

User friendly

Despite the complex technologies and processes taking place inside the device, the Scorpius is controlled by one button.

Efficiency

The device operates on pure distilled water, after 30 minutes the plasma-activated solution disintegrates into pure water and oxygen.

Proposal for cooperation

- **BUSINESS MODEL - "DELIVERY / SERVICE"**
Supply of devices or provision of services for the disinfection
- **BUSINESS MODEL "TECHNOLOGY"**
Using IPLASMA technology - integrating solutions into the production process
- **BUSINESS MODEL "INVESTOR"**
Joint localization of technology and production in Germany and / or abroad on the markets of presence. The opportunity to participate in the global expansion of IPLASMA

Scorpium kills 99.999% of all known pathogens

Viruses (including coronaviruses), bacteria, fungi, mold.

Prolonged effect after processing - up to 3 days.

iPLASMA products (complex of technologies)

1

Scorpius - Base product. Mobile device for disinfection of places of human presence. Kills 99.999% of all known pathogens. Works with pure distilled water.

2

SIRIUS is a medical device designed for the treatment of living tissues with a flow of cold plasma. The device acts on tissues with non-equilibrium cold plasma obtained in an inert gas environment.

3

AQUARIUS is designed for water purification, kills up to 99.9% fungi, bacteria, viruses and microbes. AQUARIUS: pure water, rich oxygen and useful salts - it's easy

4

TAURUS disinfects the air, destroying 99.9% of bacteria, fungi, viruses and germs. The device cleans the air from dust and small particles

IPLASMA-DE®

**WE ARE OPEN TO
COOPERATION**

IPLASMA-DE GmbH
Fritschestrasse 27,
10585 Berlin.
